

**DIGITAL SYMPOSIUM ON
AI FOR INDIA**

**India's AI Strategy &
AI for Social Good in
India**

DAY 1 - HIGHLIGHTS - 26 AUGUST

< The concept of “AI for all” anchors India’s **AI strategy on inclusive growth**. It outlines the challenges to facilitate an ecosystem that propagates technology itself. >

◀ In the Indian ecosystem, the four focus areas that need attention are the **R&D ecosystem, on-skilling of human capital, computing methods and AI alliances.** ▶

< A radically **collaborative approach** is **needed** to develop AI based solutions that make a difference. AI based solutions **must work within broader systems and programs** for scaled impact. >

Some **niche solutions** are **gaining traction for social good**. An example include a Cough based screening tool for Covid-19.
