

Six Useful Open-Source APIs for Projects

@akshaymarch7

Google Maps

Google Maps

Google Maps API key is used to access Google Maps API. Some applications or plugins using the capabilities of Google Maps require getting and adding an individual token.

Google Maps API comes free for a wide variety of use cases , with complimentary usage limits and predictable overage pricing for use of the standard APIs

Slack

Slack APIs allow you to integrate complex services with Slack to go beyond the integrations we provide out of the box

This Web API is a collection of HTTP RPC-style methods, all with URLs in the form **https://slack.com/api/METHOD_FAMILY.method**.

Secret: Use HTTPS, SSL, and TLS v1.2 or above when calling all methods. Also it is not a REST API.

Urban Dictionary

Get definitions of words and phrases, especially the slang ones.

@akshaymarch7

IMDB

IMDB API Allows developers to query for all information about films, actors or characters. It has an extensive set of API endpoints to query each aspect of a movie, series or any movie crew. It comes integrated with Rakuten RapidAPI.

Google PlayStore

The Google Play Developer API is a REST-based web service that allows you to perform publishing and app-management tasks. You can use this API to integrate your publishing operations with your release-management process.

Twilio

Twilio's APIs power its platform for communications. Behind these APIs is a software layer connecting and optimizing communications networks around the world to allow your users to call and message anyone, globally.
